

Chaperone - Assisted Living

♥ CHAPERONE - Assisted Living

Chaperone 15 and 60 helps people live independent lives for longer. It also provides peace of mind for families or carers responsible for the safety and security of someone who is at times alone.

The user is provided with a lightweight, durable and digitally connected SOS device which can be worn on a lanyard, keyring or in a pocket. Designed to withstand the challenges day to day life brings, it is water resistant and dustproof and can be used to call for immediate assistance.

SMS monitor the device 24/7 and provide two options, Chaperone 15 (tracks every 15 minutes) and Chaperone 60 (tracks every 60 minutes).

The lightweight device includes the following features:

Large SOS Button

The device features a large SOS button suitable for those with poor motor skills. Once activated the device's GPS location is sent and a two-way and recorded voice link is established to SMS.

Advanced Location Features

The device has a roaming SIM which can be tracked using GPS technology providing live locations when an SOS is activated.

Water Resistant

Water, dust & impact resistant. The device is built to stand up to daily life.

Roaming SIM

A roaming SIM card ensures the device connects to any available mobile phone network within the UK and Europe.
